

Dop index 64 modern jamb peg.

All precision machined parts (no plastic injection)

Materials:

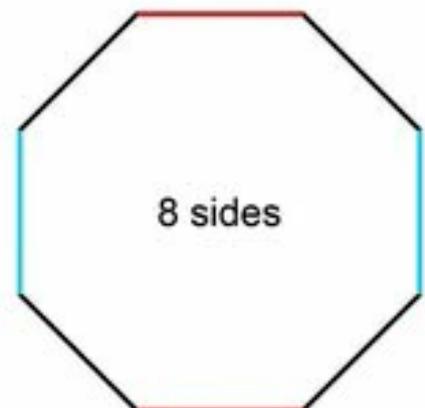

Body, Top indexer and Washer in Delrin polyacetal (low friction,Excellent Dimensional Stability,Good Chemical Resistance, Max Operating Temp 180 °F / 82°C).

Index with Big Numbers (easy to see, + righth side numbers and - left side with bar number to easy identification)

Composite Shaft :

brass top (for quick heat transfer)
Hard 420 stainless steel lower (scratch and dent resistant)

Stainless steel spring and lock washer (resistant to rust)

(8 ,4 and 2 fold mirror-image symetry)
